

Avitech GmbH is one of the leading international developers of IT systems for the aviation industry. Our comprehensive expertise ranges from single components to complete solutions, and our products are used by civil and military air navigation service providers, government agencies, civil aviation authorities and airlines in more than 40 countries around the world.

Our workforce reflects our global international presence as we have skilled employees from 20 different nations working at our locations in Friedrichshafen, Bratislava, Frankfurt and Konstanz. If you too wish to join a highly motivated team of experts and help shape the future of the aviation industry, please send us your application. We are currently looking to fill the following position in Friedrichshafen:

Integrated Product Team (IPT) Manager (m/f)

As IPT Manager you manage an inter-disciplinary product development team throughout the entire system development life-cycle. In close collaboration you work with the Team Leads of the various life-cycle disciplines, including Product Management, Systems Engineering, Software Engineering, Integration and Testing, to ensure smooth and efficient product and service delivery to internal and external stakeholders.

The duties and responsibilities of the position include the following:

- Planning, coordination and status tracking of all activities of the product development life-cycle
- Planning, coordination and status tracking of all activities required to provide deliverables and support (products and services) to organisational units external to the IPT including Offer Management, Sales and Project Management
- Sprint Planning in collaboration with Product and Project Managers taking product development goals set forth by Product Managers, as well as customer project commitments and deadlines as defined by Project Managers, into account
- Ensuring deliverables are prepared to satisfy project and product requirements- and schedule
- Ensuring adherence to defined life-cycle processes
- Generating status reports und communicating status, key accomplishments as well as issues to Department Management
- Participating in Change Control Board meetings and reporting status and issues to this panel as required
- Contributing to definition and deployment of new processes, methodologies, technologies and tools to continuously improve efficiency and quality of the product development life-cycle
- Encouraging and facilitating strong collaboration between all IPT members

The successful candidate will fulfil the following requirements:

- 5+ Years of experience in the System Development Life-Cycle ideally in various roles such as Software Engineering, Integration, Testing or experience in similar roles (e.g. as Scrum Master)
- Solid understanding and experience over the entire System Development Life-Cycle of software intensive systems and experience in managing a cross-functional group of engineers
- Strong communication skills, both written and verbal, with the ability to articulate strategies in a clear and concise manner and to unite a team behind common goals and objectives
- Very good spoken skills both in English and German
