Avitech GmbH is one of the leading international developers of IT systems for the aviation industry. Our comprehensive expertise ranges from single components to complete solutions, and our products are used by civil and military air navigation service providers, government agencies, civil aviation authorities and airlines in more than 40 countries around the world.

Our workforce reflects our global international presence as we have skilled employees from
20 different nations working at our locations in Friedrichshafen, Bratislava, Frankfurt and Konstanz. If you too wish to join a highly motivated team of experts and help shape the future of the aviation industry, please send us your application. We are currently looking to fill the following position in Friedrichshafen:

Test Engineer (m/f)

The duties and responsibilities of the position include the following:

➢ Creating test plans, test specifications and test data for testing certain software features in the scope of software development projects and customer projects
➢ Support in the development of the test strategy and improvement of the test process for manual and automated testing
➢ Continuous development and maintenance of the test frameworks (software and equipment)
➢ Performing and evaluating software tests at our premises and at our customer sites
➢ Creating test reports and statistics
➢ Localizing faults and creating meaningful issues reports in close collaboration with software development
➢ Review of software requirements

The successful candidate will fulfil the following requirements:

➢ Certified tester or successfully completed technical studies in computer science or a similar apprenticeship and gained experience preferably as a test engineer
➢ Structured and analytical thinking as well as an accurate method of operation together with a proactive approach and the capacity for teamwork
➢ Experience in dealing with software and computer systems on different platforms (Windows, UNIX derivatives)
➢ Practical experience with at least one programming or scripting language (e.g. Java, Groovy, Jython)
➢ Good spoken and written English
